# INDEX TO VOLUME 22

A	Page		Page
Absorption spectra of iron, cobalt, and nickel.	205	Cross, H. C., and E. E. Hill, Density of hot-rolled and heat-treated carbon steels.....	451
Alloys.....	533, 639	Current, distribution of, in supraconductors.	293
aluminum-beryllium, thermal expansion.	533	Curtis, Harvey L., and Charles Moon, Absolute measurement of capacitance by Maxwell's method.....	487
low-carbon iron chromium.....	639	—, A. T. McPherson, and A. H. Scott, Density and electrical properties of the system, rubber-sulphur.....	383
stainless iron.....	639		
Analysis, an, of the arc and spark spectra of scandium (Sc I and Sc II).....	329	D	
Antenna, capacity, calculation of.....	569	Dellinger, J. H., C. B. Jolliffe, and T. Parkinson, Cooperative measurements of radio fading in 1925.....	419
Application of the algebraic aberration equations to optical design.....	73	Density of hot-rolled and heat-treated carbon steels.....	451
Arc and spark spectra, scandium (Sc I and Sc II).....	329	of rubber-sulphur compounds.....	383
zirconium, wave-length measurements in the.....	47	Dielectric constant of rubber-sulphur compounds.....	383
Arc spectrum of scandium, wave-length measurements in the.....	61	Dioxide, sulphur, determination of.....	277
Audio currents of adjustable frequency with piezo-electric stabilization, generator for...	631	Distribution of current in supraconductors..	293
B		E	
Base point, a suggested new, on the thermometric scale.....	315	Eckman, J. R., Determination of sulphur dioxide, together with some analyses of commercial liquid sulphur dioxide.....	277
Bates, Frederick, and Francis P. Phelps, A suggested new base point on the thermometric scale and the $\alpha\leftrightarrow\beta$ inversion of quartz.....	315	—, Louis Jordan and, Gases in metals. III. The determination of nitrogen in metals by fusion in vacuum.....	467
Berglund, Torkel, Henry S. Rawdon and, Unusual features in the microstructure of ferrite.....	649	Electrical properties of rubber-sulphur compounds.....	383
Beryllium.....	533	Expansion, thermal.....	533, 639
alloys, thermal expansion.....	533	alloys of stainless iron type.....	639
thermal expansion.....	533	aluminum-beryllium alloys.....	533
Building materials, transmission of sound through.....	227	beryllium.....	533
Burette, a weight, for the micromasurement of liquid volumes.....	287	iron chromium alloys.....	639
for the accurate measurement of gas volumes without gas connection to a compensator.....	375	stainless iron.....	639
		F	
C		Fading, radio, in 1925, cooperative measurements of.....	419
Capacitance, measurement of, by Maxwell's bridge.....	487	Ferrite, unusual features in the microstructure of.....	649
Capacity of antennas, calculation of.....	569	Finn, A. N., L. W. Tilton, A. O. Tool and, Cause and removal of certain heterogeneities in glass.....	719
Cause and removal of certain heterogeneities in glass.....	719	Formulas, antenna capacity.....	569
Charge, electrical, indeterminateness of.....	547		
Christer, V. L., Transmission of sound through building materials.....	227	G	
Cobalt, absorption spectra of.....	205	Gardner, I. C., Application of the algebraic aberration equations to optical design.....	73
Coblentz, W. W., and C. O. Lampland, Further radiometric measurements and temperature estimates of the planet Mars, 1926.	237	Gas volumes without gas connection to a compensator, a burette for the accurate measurement of.....	375
Color system, the Lovibond.....	1	Gases in metals.....	467
Conductors, supra, distribution of current in.	293		

	Page		Page
Generator for audio currents of adjustable frequency with piezo-electric stabilization.....	631	McPherson, A. T., A. H. Scott, H. L. Curtis and, Density and electrical properties of the system, rubber-sulphur.....	383
Gibson, K. S., and F. K. Harris, The Lovibond color system. I. A spectrophotometric analysis of the Lovibond glasses, with a prefatory statement by Irwin G. Priest.....	1	Magnet steels, choice and utilization of.....	557
Glass, cause and removal of certain heterogeneities in.....	719	Magnetic charge.....	547
Glasses, a spectrophotometric analysis of the Lovibond.....	1	Mars, 1926, further radiometric measurements and temperature estimates of the planet.....	237
Grover, Frederick W., Methods, formulas, and tables for the calculation of antenna capacity.....	569	Maxwell bridge, use of, in measuring capacitance.....	487
<b>H</b>		Measurements of radio fading in 1925.....	419
Harris, F. K., K. S. Gibson and, The Lovibond color system. I. A spectrophotometric analysis of the Lovibond glasses, with a prefatory statement by Irwin G. Priest.....	1	Meyers, William F., Norris Russel and, Analysis of the arc and spark spectra of scandium (Sc I and Sc II).....	329
Heat of transformation of quartz.....	315	—, and F. M. Walters, jr., Absorption spectra of iron, cobalt, and nickel.....	205
Heterogeneities in glass, cause and removal of.....	719	—, Wave-length measurements in the arc spectrum of scandium.....	61
Hidnert, Peter, and W. T. Sweeney, Thermal expansion of alloys of the "stainless iron" type.....	639	Metals, gases in.....	467
—, Thermal expansion of beryllium and aluminum beryllium alloys.....	533	pure iron, density of.....	451
Hill, E. E., H. C. Cross and, Density of hot-rolled and heat-treated carbon steels.....	451	Micromerement of liquid volumes, a weight burette for.....	257
Hund, August, Generator for audio currents of adjustable frequency with piezo-electric stabilization.....	631	Microstructure of ferrite, unusual features in.....	649
<b>I</b>		Moon, Charles, Harvey L. Curtis and, Absolute measurement of capacitance by Maxwell's method.....	487
Indeterminateness of electrical charge.....	547	<b>N</b>	
Inversion of quartz, $\alpha \rightleftharpoons \beta$ .....	315	Nickel, absorption spectra of.....	205
Iron, absorption spectra of.....	205	Nitrogen in metals, determination by fusion in vacuum.....	467
Iron chromium alloys, thermal expansion of.....	639	<b>O</b>	
<b>J</b>		Optical design, application of the algebraic aberration equations to.....	73
Jordan, Louis, and James R. Eckman, Gases in metals. III. The determination of nitrogen in metals by fusion in vacuum.....	467	<b>P</b>	
Jolliffe, C. B., T. Parkinson, J. H. Dellinger and, Cooperative measurements of radio fading in 1925.....	419	Parkinson, T., C. B. Jolliffe, J. H. Dellinger and, Cooperative measurements of radio fading in 1925.....	419
<b>K</b>		Phelps, Francis P., Frederick Bates and, A suggested new base point on the thermometric scale and the $\alpha \rightleftharpoons \beta$ inversion of quartz.....	315
Kiess, C. C., Wave-length measurements in the arc and spark spectra of zirconium.....	47	Piezo-electric stabilization, generator for audio currents of adjustable frequency with.....	631
<b>L</b>		Power factor of rubber-sulphur compounds.....	383
Lampland, C. O., W. W. Coblenz and, Further radiometric measurements and temperature estimates of the planet Mars, 1926.....	237	Priest, Irwin G., A prefatory statement, comprising part of technologic paper on "The Lovibond Color System".....	1
Liquid, sulphur dioxide, analysis of commercial.....	277	<b>Q</b>	
volumes, a weight burette for the micromerement of.....	287	Quartz, $\alpha \rightleftharpoons \beta$ inversion of.....	315
Lovibond, color system.....	1	<b>R</b>	
glasses, a spectrophotometric analysis of the.....	1	Radio antennas, capacity of.....	569
<b>M</b>		Radic fading in 1925, cooperative measurements of.....	419
Measurements of radio fading in 1925.....	419	Radiometric measurements and temperature estimates of the planet Mars, 1926.....	237
Meyers, William F., Norris Russel and, Analysis of the arc and spark spectra of scandium (Sc I and Sc II).....	329	Rawdon, Henry S., and Torkel Berglund, Unusual features in the microstructure of ferrite.....	649
—, and F. M. Walters, jr., Absorption spectra of iron, cobalt, and nickel.....	205	Resistivity of rubber-sulphur compounds.....	383
—, Wave-length measurements in the arc spectrum of scandium.....	61	<b>S</b>	
Metals, gases in.....	467	Spectrophotometric analysis of the Lovibond glasses, with a prefatory statement by Irwin G. Priest.....	1
pure iron, density of.....	451	<b>T</b>	
Micromerement of liquid volumes, a weight burette for.....	257	Thermal expansion of alloys of the "stainless iron" type.....	639
Microstructure of ferrite, unusual features in.....	649	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Moon, Charles, Harvey L. Curtis and, Absolute measurement of capacitance by Maxwell's method.....	487	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
<b>N</b>		Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Nickel, absorption spectra of.....	205	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Nitrogen in metals, determination by fusion in vacuum.....	467	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
<b>O</b>		Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Optical design, application of the algebraic aberration equations to.....	73	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
<b>P</b>		Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Parkinson, T., C. B. Jolliffe, J. H. Dellinger and, Cooperative measurements of radio fading in 1925.....	419	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Phelps, Francis P., Frederick Bates and, A suggested new base point on the thermometric scale and the $\alpha \rightleftharpoons \beta$ inversion of quartz.....	315	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Piezo-electric stabilization, generator for audio currents of adjustable frequency with.....	631	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Power factor of rubber-sulphur compounds.....	383	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Priest, Irwin G., A prefatory statement, comprising part of technologic paper on "The Lovibond Color System".....	1	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
<b>Q</b>		Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Quartz, $\alpha \rightleftharpoons \beta$ inversion of.....	315	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
<b>R</b>		Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Radio antennas, capacity of.....	569	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Radic fading in 1925, cooperative measurements of.....	419	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Radiometric measurements and temperature estimates of the planet Mars, 1926.....	237	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Rawdon, Henry S., and Torkel Berglund, Unusual features in the microstructure of ferrite.....	649	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Resistivity of rubber-sulphur compounds.....	383	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
<b>S</b>		Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Spectrophotometric analysis of the Lovibond glasses, with a prefatory statement by Irwin G. Priest.....	1	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
<b>T</b>		Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of alloys of the "stainless iron" type.....	639	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
Thermal expansion of beryllium and aluminum beryllium alloys.....	533	Thermal expansion of beryllium and aluminum beryllium alloys.....	533
